SDG i Level

DID YOU KNOW?

- Per kilowatt hour, 474g CO2, or 7.9g of CO2 per minute is produced.

- A laser printer that prints 10 pages per minute with 1.3KW causes 7.9g CO2 x 1.3KW = 10.27g CO2.

- This means that a page printed with a laser printer produces approximately 1g of CO2.
